# Student Success:
A Strategic Priority

DECEMBER 2022

"Colleges and Universities that fail to shift from a traditional, institutional focus, to a student centric focus, with a clear and strategic emphasis on student success, will face their own extinction."

- Anthology Together 2022

ESF State University of New York College of **Environmental Science and Forestry**

Demographic Headwinds
"…beginning in 2026, the number of native born children reaching college age will begin a rapid decline…the Great Recession did not simply delay births – it eliminated them."
- Nathan D. Grawe

Combining Best-in-Tech Solutions
to Power Your Success

Anthology and Blackboard completed their merger on October 25, 2021, creating the largest EdTech ecosystem at a global scale.

Our passion is making the lives of learners, educators, and leaders easier. That's why we create experiences that are more informed and personalized to support learning, teaching, and leading more effectively.

By responsibly leveraging data, our solutions enable insights and information at the right time, in the right way, to support the right actions—with data privacy and security at the forefront of our approach.

Robust proactive assessments and predictive analytics

Advisor-centered functionality to manage individuals and cohorts

Collaboration capabilities for faculty and advisors

Flexible early alerts to involve the right support

Student relationship management to deliver resources or keep in touch

Visualizations and dashboard analyses to drive impact

The Top Ten Challenges of Early Alert Systems
(and How to Avoid Them!)

anthology together

#AT22

Top 10 Challenges

- "We have an alert system, but it's only used by a few stakeholders."

- "We can't keep up with the number of alerts collected by the system."

- "Faculty share concerns, but they share them too late."

- "Faculty don't tell us ENOUGH information when they report alerts."

- "Faculty tell us TOO MUCH information when they report alerts."

- "Alerts sit without a response for too long."

- "Not everyone who is supposed to respond to the alerts do."

- "Too many people follow up with a student about an alert."

- "Depending on who responds, a student may receive a different guidance or level of care."

- "We have no idea if (or how) our early alert system is making an impact."

It's critical to implement a process, not just a software.

Soon, Georgia State was partnering with private vendors to develop new forms of data analytics and online technology: an academic advising platform that could predict outcomes based on student performance as early as the first semester of freshman year, or an artificial intelligence chatbot to guide high school graduates through the thicket of financial aid forms they needed to fill out before their first day on campus. The university also fundamentally redefined the relationship between the central administration and the deans and faculty, so Renick was able to institute wide-ranging reforms without the usual pushback from colleges and department heads who thought they knew better.

Mental Health

Student Mental Health
Continuum

Severe mental illness causing distress

Distress Developing

Wellness Developing

Positive and healthy functioning

0   1   COVID Generation ...ric Distribution 11 to 13% Ill or Injured   9   10

Ill

Clinical Disorder, Severe & Persistent Functional Impairment. Panic attacks. Constant fatigue. Suicidal thoughts/intent/behavior.

Injured

Significant Functional Impairment. Anger, anxiety. Lingering sadness, tearfulness. Decreased performance in academics. Avoidance of social situations.

Reacting

Common & Reversable Distress. Irritable/Impatient. Nervousness, sadness. Procrastination, forgetfulness. Decreased social activity.

Healthy

Normal mood fluctuations. Takes things in stride. Consistent performance. Normal sleep patterns. Physically and socially active.

ESF

THE CHRONICLE OF HIGHER EDUCATION.

Building Students' Resilience
Strategies to support their mental health

"Counseling centers are doing a heroic job trying to meet demand, but for most of them that goal was hard to reach before the pandemic.

It is even further out of reach now."

"Beyond basic needs, colleges should acknowledge students' heightened anxiety, without universally pathologizing it." –

Peter Cornish, University of California at Berkeley

Approach | Student-Centered Care

On-Demand 24/7 Care
Immediate student care is always available via phone, video, video chat, and text.

Care Navigation
Our care coordinators are high-touch and help students navigate the right next steps before and after any TimelyCare visit.

Care Protocols
These protocols help us jointly define how to manage different situations and manage student needs in conjunction with existing services

Scheduled Visits
One-click scheduling shows the first available providers for for the desired date and time, and the preferred provider with 100% follow-up.

Campus Health Services
The approach to student care begins in student services and campus health.

Continuity of Care
Through shared Care Summaries, EMR integrations, and referrals we ensure that each student gets the right care.

ESF

TimelyCare | Enabling + Integrating Well-Being

Student centered health and well-being takes a village. When you work with TimelyMD we enable well-being beyond the care setting. The services below are included in most packages offered.

Health Coaching

A student's personal health cheerleader and guide to implement lifestyle changes to help improve overall health and well-being.

Care Navigation + Basic Needs

Care coordinators help make sure students know and understand the next steps in their care.

Digital Self-Care

Self-serve, well-being content designed to enhance a sense of calm, rest, and self-esteem both live and on-demand.

Faculty + Staff Support

Train your faculty and staff to spot the signs of student distress and help students connect with TimelyCare.
